# INLINE FILTER for Spirosound

Effective protection from infection as well as highest test accuracy

- Additional protection for pulmonary function testing while COVID-19
- Easy replacement of critical parts for single-patient use (like spirette, adapter and filter)
- Device and filter offer double the protection through the unique Spirette and FlowTube concept
- No risks of cross-contamination of spirosound
- Application of filter helps to keep the ambient environment clean for medical staff and patients
